

General Information (Origin of Request)		
<input type="checkbox"/> User Requirements (URD) <input checked="" type="checkbox"/> Other User Functional or Technical Documentation (SYS)		
Request raised by: 4CB	Institute: 4CB	Date raised: 05/12/2013
Request title: Namespace correction in supplementary data element		Request ref. no: T2S 0448 SYS
Request type: Common		Urgency: Medium
1. Legal/business importance parameter: Medium	2. Market implementation efforts parameter: Low	
3. Operational/Technical risk parameter: Medium	4. Financial impact parameter: No cost impact	
Requestor Category: 4CB	Status: Authorised at Steering Level	

Reason for change and expected benefits/business motivation:

Reason:

With regards to the testing activities an erroneous namespace extension was detected within several schemas hindering proper message validation.

In order to ensure a smooth communication with the T2S platform it is necessary to correct the erroneous namespace extension as described below.

Expected benefits/ legal motivation:

The updates of the message documents are necessary in order to avoid failing validation of messages using the supplementary data component when generated at the T2S-application.

Description of requested change:

The message schema for the following messages inadvertently includes an erroneous namespace extension within the supplementary data component hindering the proper validation of the schema and the supplementary data schema.

semt.014, semt.015, sese.024, sese.025, sese.032, camt.067, camt.068

The message schema for the following message is inadvertently missing the namespace within the supplementary data component hindering the proper validation of the schema and the supplementary data schema.

reda.012

Submitted annexes / related documents:

The updated message documentation of the impacted messages will be available after the approval under the following link:

<http://www.bundesbank.de/Redaktion/EN/Documentation/4zb/HtmlDoc/v1.2.1/CR/CR-Overview.pdf>

Proposed wording for the Change request:

The extension “.xsd” within the namespace present in the SupplementaryDataEnvelope1 of the message schema needs to be removed:

```
<xs:complexType name="SupplementaryDataEnvelope1">
  <xs:annotation>
    <xs:documentation source="Name" xml:lang="EN">SupplementaryDataEnvelope1</xs:documentation>
    <xs:documentation source="Definition" xml:lang="EN">Technical component that contains the validated supplementary data information. This technical envelope allows to segregate the supplementary data information from any other information.</xs:documentation>
  </xs:annotation>
  <xs:sequence>
    <xs:any namespace="urn:eurosystem:xsd:DRAFT2supl.021.001.01" processContents="strict">
      <xs:annotation>
        <xs:documentation source="Name" xml:lang="EN">Contents</xs:documentation>
        <xs:documentation source="Definition" xml:lang="EN">Technical element that specifies the supplementary data.</xs:documentation>
      </xs:annotation>
    </xs:any>
  </xs:sequence>
</xs:complexType>
```

This change is required for the following schemas making use of the supplementary data supl.021.001.01. semt.014, semt.015, sese.024, sese.025, sese.032, camt.067, camt.068

The namespace “urn:t2s:MktSpfcAttrReport.xsd” is missing in the SupplementaryDataEnvelope1 and needs to be added. Processing for the included schema must be switched into “strict” in order to check the compliance of the content against the schema.

```
<xs:complexType name="SupplementaryDataEnvelope1">
  <xs:annotation>
    <xs:documentation source="Name" xml:lang="EN">SupplementaryDataEnvelope1</xs:documentation>
    <xs:documentation source="Definition" xml:lang="EN">Technical component that contains the validated supplementary data information. This technical envelope allows to segregate the supplementary data information from any other information.</xs:documentation>
  </xs:annotation>
  <xs:sequence>
    <xs:any namespace="urn:t2s:MktSpfcAttrReport.xsd" processContents="strict">
      <xs:annotation>
        <xs:documentation source="Name" xml:lang="EN">Contents</xs:documentation>
        <xs:documentation source="Definition" xml:lang="EN">Technical element that specifies the supplementary data.</xs:documentation>
      </xs:annotation>
    </xs:any>
  </xs:sequence>
</xs:complexType>
```

This change is required for the schema of reda.012.

High level description of Impact:

Outcome/Decisions:

- * CRG meeting of 10 February 2014: The CRG recommended the approval of the Change Request.
- * Advisory Group's advice on 12 March 2014: Following a written procedure from 6 to 12 March 2014, the AG was in favour of the Change Request.
- * CSG resolution on 12 March 2014: Following a written procedure from 6 to 12 March 2014, the CSG adopted the resolution to approve the Change Request.
