

30 April 2010

PRESS RELEASE

EURO AREA ECONOMIC AND FINANCIAL DEVELOPMENTS BY INSTITUTIONAL SECTOR: FOURTH QUARTER 2009

In the fourth quarter of 2009, the annual growth rate! of **net disposable income in the <u>euro area</u>** equalled -0.8%, compared with -3.4% in the third quarter of 2009 (see Annex Table 1). **Final consumption** in the euro area increased in the fourth quarter (0.8% annually, after a decrease, -0.3%, in the previous quarter). The annual growth rate of **gross fixed capital formation was** -8.6% in the fourth quarter of 2009, against -12.1% in the previous quarter. In the fourth quarter of 2009, the annual growth rate of **net saving** was -24.9%, up from -47.0% in the third quarter.

The annual growth rate of <u>households</u>' gross disposable income² increased to 0.9% in the fourth quarter of 2009, up from -0.3% in the previous quarter (see Table 2). The annual growth of households' consumption expenditure was -0.1% in the fourth quarter compared with -2.0% in the previous quarter. Gross saving of households increased by 6.5% in the fourth quarter (down from 12.9% previously). The households' gross saving rate³ stood at 15.4%, compared with 13.9% in the fourth quarter of 2008. The annual growth rate of financing of households remained broadly unchanged at 2.6% in the fourth quarter of 2009 compared with 2.5% in the previous quarter, and the annual growth rate of their financial investment was unchanged at 3.2% in the fourth quarter of 2009, compared with the previous quarter. Households' net financial wealth increased by 8.5% in the fourth quarter after 4.1% in the previous quarter. (see Chart 6).

The annual growth rate of **gross fixed capital formation of <u>non-financial corporations</u>** in the euro area increased to -9.9% in the fourth quarter of 2009, up from -14.4% in the previous quarter (see Table 3). The annual rate of growth of **net entrepreneurial income** of non-financial corporations increased to -1.0% in the fourth quarter, compared with -9.2% in the previous quarter. The annual growth rate of **financing** of non-financial corporations was 1.2% in the fourth quarter, compared with 2.1% previously, and

¹ The euro area accounts are expressed in current prices and they are not seasonally adjusted. The (nominal) growth rates are presented as year-on-year changes (see the notes).

². Adjusted for the change in net equity of households in pension fund reserves (receivables - payables)..

³ The households' saving rate is based on four-quarter cumulated sums of both their saving and their gross disposable income.

the annual growth rate of their **financial investment** was 1.9% in the fourth quarter of 2009, compared with 2.4% in the previous quarter.

Total euro area economy

The annual growth rate of euro area net disposable income has increased to -0.8% in the fourth quarter of 2009 as compared with -3.4% in the previous quarter. The negative growth in net disposable income is due to a drop in net disposable income of general government, not compensated for by increases in non-financial corporations' and households' net disposable income (see Chart I). Euro area **gross fixed capital formation** decreased by -8.6% annually, compared with -12.1% in the preceding quarter. This negative growth was due to non-financial corporations and households (see Chart 2). The growth rate of **gross capital formation**⁴ was -13.9% in the fourth quarter, up from -16.2% in the previous quarter. This negative investment growth coincided with a negative annual growth of euro area **net saving** of -24.9%, compared to -47.0% in the previous quarter, as decreases in net saving of the government exceeded increases in corporations' and households' saving (see Chart 3).

Households

The annual growth rate of households' gross disposable income⁵ increased to 0.9% in the fourth quarter of 2009, up from -0.3% in the previous quarter. This was mainly due to an increase in the annual growth rates of **net property income** received and **operating surplus and mixed income**. (see Chart 4).

The annual growth rate of households' **consumption expenditure** (-0.1%) was below the annual growth rate of their disposable income, which led to a continued but slower growth of households' gross saving, of 6.5% (after 12.9% previously). The annual rate of change of gross fixed capital formation of households increased to -10.5% in the fourth quarter, up from -13.1% in the third quarter. The four-quarter moving average households' **gross saving rate** increased to 15.4% (compared to 13.9% in the fourth quarter of 2008). The annual growth rate of **household sector's net lending**, 6 was 3.6% in the fourth quarter of 2009, the same as the previous quarter.

The annual growth rate of **financing** of households stood at 2.6% in the fourth quarter of 2009, up from 2.5% in the third quarter. This coincided with an increase in the annual growth rate of their **gross non-financial investment** to -11.6%, from -14.3% previously (see Chart 5) whilst their **financial investment** was unchanged at 3.2% from the previous quarter.

⁴ This also includes changes in inventories and net acquisitions of non-produced, non financial assets.

⁵ Adjusted for the change in net equity of households in pension fund reserves (receivables - payables).

⁶ For the sectors households and non-financial corporations, the figures for net lending / net borrowing derived from the non-financial accounts differ somewhat from those derived from the financial accounts, due to remaining statistical discrepancies.

Turning to the components of **households' financial investment**, the annual growth rate of their investment in currency and deposits decreased to 3.4% in the fourth quarter of 2009, from 5.2% in the previous quarter. The growth of their investment in debt securities was -2.1% in the fourth quarter, compared with -0.9% in the previous quarter. The growth rate of household's investment in shares and other equity increased to 1.4% in the fourth quarter, up from 0.1% previously. The annual growth rate of households' additions to life insurance and pension fund reserves increased to 5.3% in the fourth quarter, compared to 4.0% previously.

Developments in **households' financial balance sheet** were dominated by valuation changes of their financial assets. Growth of households' **net financial wealth** was 8.5% in the fourth quarter of 2009, after 4.1% in the previous quarter (see Chart 6). The growth rate of the market value of households' holdings of shares and other equity was 10.3% in the fourth quarter of 2009, compared with -1.3% previously (see Table 2).

Non-financial corporations

The annual growth rate of **net entrepreneurial income** of non-financial corporations⁷ stood at -1.0% in the fourth quarter of 2009, up from -9.2% in the previous quarter (see Table 3). This largely reflects a higher growth rate of net value added of -3.0% (up from -5.9% in the previous quarter). (see Chart 7 and Table 3). The decrease in **gross fixed capital formation** of non-financial corporations became less pronounced (growth was -9.9% annually in the fourth quarter of 2009, after -14.4% in the previous quarter) (see Chart 8). The annual growth rate of total gross non-financial investment, which also includes inventories, was -20.0%, compared with -21.6% in the previous quarter.

In the fourth quarter of 2009, the annual growth rate of **financing** by non-financial corporations decreased to 1.2%, from 2.1% previously. The growth rate of their loan financing amounted to 0.0%, compared with 1.7% in the previous quarter. The annual growth rate of their issuance of debt securities decreased to 10.4%, from 12.9%. The annual growth rate of their equity financing, via the issuance of quoted and unquoted shares and other equity, decreased to 1.9%, compared with 2.5% in the previous quarter.

Financial investment growth of non-financial corporations moderated to 1.9% after 2.4% in the previous quarter. The annual growth rate of their investment in debt securities decreased to -7.0% (compared with -1.6% previously), while the annual growth rate of investment in currency and deposits increased to 5.1%, from 2.9% previously. The growth rate of loans granted decreased to 2.7% in the fourth quarter of 2009, after 4.5% previously. The growth rate of their investment in shares and other equity decreased to 2.8%, after 4.6% in the third quarter.

⁷ Net entrepreneurial income is broadly equivalent to current profits in business accounting (after the receipt and payment of interest and including the profits of foreign subsidiaries, but before the payment of income taxes and dividends).

The outstanding amounts of both financial assets and financial liabilities increased in the fourth quarter (by 7.9% and 6.8% respectively), whereas for the previous quarter the annual growth rates were 1.1% and 1.4% respectively. (see Table 3).

Insurance corporations and pension funds

The annual growth rate of **insurance technical reserves**, the major financing instrument of insurance corporations and pension funds, increased to 5.1% in the fourth quarter of 2009 compared to 3.4% in the third quarter (see Table 6). The annual growth rate of the issuance of shares and other equity increased by 0.9% after an increase of 0.8% previously. The annual growth rate of their **financial investment** increased to 3.6% from 2.7% in the previous quarter. The growth rate of their investment in debt securities increased to 4.2%, from 2.1% previously, while that of their investment in shares and other equity increased to 6.1%, from 3.8% in the previous quarter.

An increase in outstanding amounts of assets in the **financial balance sheet** of insurance corporations and pension funds occurred as the market value of shares and other equity held increased by 15.2 % following an increase of 1.1% in the preceding period.

Notes

The annual growth rate of non-financial transactions and of outstanding financial assets and liabilities (stocks) is calculated as the percentage change between the value of the transaction or outstanding amount for a given quarter and that value recorded four quarters earlier. Let x_i be the level of a non-financial transaction or end-of-quarter stock, then its annual percentage change $g(x_i)$ is calculated as:

$$g(x_t) = \frac{(x_t - x_{t-4})}{x_{t-4}} * 100.$$

The annual growth rate used to analyse financial transactions refers to the total value of transactions during the year in relation to the outstanding stock a year before. These growth rates for financial transactions exclude the effect on the outstanding stock of revaluations, reclassifications, and further changes that do not arise from transactions. When f_t represents the value of transactions in a particular financial instrument, and F_t represents the value of the corresponding stock outstanding at the end of quarter t, then the annual growth rate $\mathbf{g}(f_t)$ is calculated as the sum of the transactions during the year divided by the outstanding stock a year ago:

$$g(f_t) = \left(\sum_{i=0}^{3} f_{t-i} / F_{t-4}\right) * 100$$

5

- The euro area accounts encompass integrated non-financial and financial accounts, including financial balance sheets. They are jointly compiled by the ECB and the European Commission (Eurostat), in close cooperation with the national central banks and the national statistical institutes in the EU.8 The European sector accounts follow the methodology of the European System of Accounts 1995 (ESA 95).9 A detailed set of quarterly data is published in Tables 3.1 - 3.5, "Euro area accounts", of the statistics section of the ECB's Monthly Bulletin.
- This press release incorporates revisions for the third quarter of 2009 and for previous quarters.
- tables Α comprehensive of made available set is at http://www.ecb.eu/stats/acc/html/index.en.html (ECB). The time series for the euro area accounts can be downloaded from the ECB's Statistical Data Warehouse.
- The publication of euro area economic and financial developments in the first quarter of 2010 is scheduled to take place on 29 July 2010 at 10.00 am (CET).

¹⁾ Households and non-profit institutions serving households.

²⁾ Annual percentage changes are calculated as $100^*(x_t - x_{t-4})/x_{t-4}$ where x_t stands for the transaction or end-of-quarter stock x in quarter t, and x_{t-4} for the transaction or stock four quarters earlier.

³⁾ Net adjustment for the change in net equity of households in pension fund reserves (receivables - payables).

⁴⁾ Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

5) Annual growth rates for financial transactions are calculated as 100*(f₁+f₁₋₂+f₁₋₂)/F₁₋₄ where f₁ stands for the transactions in quarter t, and F₁₋₄ for the end-of-quarter stock value four quarters earlier.

⁶⁾ Loans granted, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.

⁷⁾ Financial derivative net liabilities, pension fund reserves and other accounts payable.

Sources: ECB and Eurostat

1) Annual percentage changes are calculated as 100*(x_t-x_{t-4})/x_{t-4} where x_t stands for the transaction or end-of-quarter stock x in quarter t, and x_{t-4} for the transaction or stock four quarters earlier.

2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

³⁾ Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

⁴⁾ Annual growth rates for financial transactions are calculated as $100^*(f_t+f_{t-1}+f_{t-2}+f_{t-3})/F_{t-4}$ where f_t stands for the transactions in quarter t, and F_{t-4} for the end-of-quarter stock value four quarters earlier.

⁵⁾ Other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.
6) Other accounts payable, financial derivative net liabilities and deposits.

¹⁾ Annual percentage changes are calculated as $100^*(x_{t^-}x_{t-4})/x_{t-4}$ where x_t stands for the transaction or end-of-quarter stock x in quarter t, and x_{t-4} for the transaction or stock four quarters earlier.

²⁾ Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets.

³⁾ Annual growth rates for financial transactions are calculated as $100^*(f_t+f_{t,1}+f_{t,2}+f_{t,3})/F_{t,4}$ where f_t stands for the transactions in quarter t, and $F_{t,4}$ for the end-of-quarter stock value four quarters earlier.

⁴⁾ In line with existing conventions, the financing of the government excludes the net incurrence of liabilities via financial derivatives, shares and other equity, pension fund reserves and other accounts payable, and the financial investment of the government excludes financial derivatives, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.

⁵⁾ Other accounts receivable, financial derivatives and prepayments of insurance premiums and reserves for outstanding claims.

⁶⁾ Other accounts payable, pension fund reserves, financial derivatives and unquoted shares and other equity.

⁷⁾ General government debt at nominal value and consolidated between sub-sectors of general government.

¹⁾ Annual percentage changes are calculated as $100^x(x_t-x_{t-4})/x_{t-4}$ where x_t stands for the transaction or end-of-quarter stock x in quarter t, and x_{t-4} for the transaction

¹⁾ All fluid percentage changes are calculated as 100 (x x₁₄/x₁₄ minor x₁ bands to the distribution of the four quarters earlier.

2) As a percentage of net value added in the case of net entrepreneurial income and net saving.

3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

4) Annual growth rates for financial transactions are calculated as 100*(f₁+f₁₊₁+f₁₋₂+f₁₋₃)/F₁₋₄ where f₁ stands for the transactions in quarter t, and F₁₋₄ for the end-ofquarter stock value four quarters earlier.

⁵⁾ Monetary gold and SDRs, other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

⁶⁾ Other accounts payable and financial derivative net liabilities.

1) Annual growth rates for financial transactions are calculated as 100*(f_t+f_{t-1}+f_{t-2}+f_{t-3})/F_{t-4} where f_t stands for the transactions in quarter t, and F_{t-4} for the end-of-quarter stock value four quarters earlier.

²⁾ Other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.

3) Other accounts payable and financial derivative net liabilities.

4) Annual percentage changes are calculated as 100*(x₁-x₁₋₄)/x₁₋₄ where xt stands for the transaction or end-of-quarter stock x in quarter t, and x₁₋₄ for the transaction or stock four quarters earlier.
